Résumé ou extrait : Presenting a thorough examination of intelligence activities in international law, Sophie Duroy provides theoretical and empirical justifications to support the cutting-edge claim that states' compliance with international law in intelligence matters serves their national security interests. This book theorises the regulation of intelligence activities under international law, identifying three layers of regulation: a clear legal framework governing intelligence activities (legality); a capacity to enforce state responsibility (accountability); and the integration of legality and accountability into responsive regulation by the international legal order (compliance).
