Résumé ou extrait : La jaquette indique : "Using the analogy of a devastating series of earthquakes, Davutoğlu provides a new theoretical approach, conceptualization, and methodology for understanding crisis in the post-Cold War era. In order to grasp the scale and scope of the ongoing crises we are experiencing today, Davutoğlu conceptualizes them as "aftershocks," following in the wake of the four great "quakes" that have shaken the world in recent times - namely, the geopolitical earthquake triggered by dissolution of the Soviet Union, 1991; the security earthquake, post- 9/11, 2001; the economic earthquake associated with the global economic crisis, 2008; and the structural earthquake of the Arab Spring, 2011. By contextualizing international order as being impacted by a number of intertwined processes, the book then looks to the possible futures ahead. Following his analysis of the ongoing systemic crisis, Davutoğlu forges a vision for a new order of global democracy, built from the rubble of the systemic earthquake."
