

Superintelligence

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Superintelligence : paths, dangers, strategies / Nick Bostrom,...

Auteur(s) : Bostrom, Nick (1973-....)

Publication : Oxford : Oxford university press, 2016

Description matérielle : 1 vol. (XVI-415 p.) : ill., couv. ill. ; 20 cm

ISBN : 978-0-19-873983-8
0-19-873983-4

EAN : 9780198739838

Classification décimale Dewey : 006.3

Note sur l'édition et l'histoire bibliographique : Autre tirage : 2017

Note sur les bibliographies et les index : Bibliogr. p. 383-406. Notes bibliogr. Glossaire. Index

Résumé ou extrait : The human brain has some capabilities that the brains of other animals lack. It is to these distinctive capabilities that our species owes its dominant position. Other animals have stronger muscles or sharper claws, but we have cleverer brains. If machine brains one day come to surpass human brains in general intelligence, then this new superintelligence could become very powerful. As the fate of the gorillas now depends more on us humans than on the gorillas themselves, so the fate of our species then would come to depend on the actions of the machine superintelligence. But we have one advantage: we get to make the first move. Will it be possible to construct a seed AI or otherwise to engineer initial conditions so as to make an intelligence explosion survivable? How could one achieve a controlled detonation? [Source : site de l'éditeur]
