Résumé ou extrait : La 4e de couv. indique : "Cultures of violence are characteristic of many countries in sub-Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual. And yet, the wide variations in levels of violence within and between countries show that it is not inevitable; rather, it is the result of choices made at individual, community and societal levels. This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace. Peace infrastructures vary hugely in sophistication and level. The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations, peace committees which serve local communities, peace education and peace club programmes in schools, mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non-government efforts in peacemaking and peacebuilding. The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace."
