Résumé ou extrait : La p. de garde indique : "How are the rising mutual concerns of Asian and European countries shaping their approaches to the international order ? Contributors to this volume discuss emerging critical issues in International relations, including the Indo-Pacific constructs, China's Belt and Road Initiative (BRI), and the progress of established regional security mechanisms like the Shanghai

Cooperation Organisation. They also compare western and non-western approaches to these issues, with a holistic perspective on the origins and evolutions of these approaches. Both the Indo-Pacific constructs and BRI present a remarkable set of opportunities for Europe as well as Asia. This book presents key implications of the changing politico-security dynamics in the two regions from the perspectives of both Asian and European scholars and theoretical traditions. This volume is a must-read for scholars of International Relations with a focus on relations between Asia and Europe."
