Classification décimale Dewey : 364.168 2

Note sur la description bibliographique : Consultable à l'adresse

Note sur les bibliographies et les index : Bibliogr. p. 94-96. Glossaire

Note sur le contenu : Introduction Developing capacities in cyberspace Building blocks for strengthening cybersecurity capacities Rule of law and human rights in cyberspace Achieving growth through cyber resilience Capacity building as a means to counter 'cyber poverty' Models for cybersecurity capacity building

Résumé ou extrait : L'avant-propos indique : "This report offers a valuable contribution to shaping the EU's posture on capacity building. By promoting a development-focused approach to the issue, it provides a valuable alternative to the predominantly threat-oriented narrative about cybersecurity. The authors address security not as an end in itself but rather as a means towards social, economic and political development. Consequently, they seek to build bridges between different policy communities. As noted on numerous instances in these pages, such a comprehensive and integrated approach to cyber capacity building is instrumental to ensuring the sustainability and the effectiveness of current and future initiatives in this domain."

Sujet - Nom commun : Cyberspace -- Aspect social

Cyberespace -- Aspect économique
Cyberespace -- Mesures de sûreté
