Résumé ou extrait : This book explores how the emerging superpower rivalry between the U.S. and China compares to the Cold War, and what that means for the future of global politics. By examining the similarities and differences, it provides insights into the unique characteristics and potential trajectory of this 21st-century conflict. Featuring contributions from leading strategic thinkers like Stephen Walt, Taylor Fravel, Scott Kastner, Francois Heisbourg and Thomas J. Christensen, the book analyses key aspects such as economic and military balances, technological impacts, and geopolitical dynamics. It offers a nuanced perspective on a relationship that could be as consequential as the Cold War, urging readers to approach it with an informed understanding of critical differences.
