Résumé ou extrait : "Part of The US Army Large-Scale Combat Operations Series, this collection of 10 historical case studies covers mobility and countermobility operations drawn from the past 100 years, with insights for modern large-scale combat operations. The essays also highlight several themes that current commanders and doctrine developers must be aware of when discussing or conducting mobility operations. The volume is organized chronologically to include World War I, World War II, Korean War, 1973 Arab-Israeli War, and Desert Storm. The volume ends with a futures chapter discussing the way ahead in the mobility and countermobility arena." (éd.)
