Résumé ou extrait : "Col. Frank Kowalski served as the Chief of Staff of the American military advisory group that helped establish the National Police Reserve, the predecessor to the Japan Self- Defense Forces during its first two years of existence. His work provides a detailed account of the manning, logistics, and personalities involved in standing up--on short notice --of a force of approximately 75,000, while sharing insights about the diplomatic, political, legal, and constitutional challenges his headquarters and his Japanese counterparts faced in rearming Japan in the wake of the sudden outbreak of the Korean War. Published in Japanese in 1969, this is the first English version of this edition, and includes a biographic section about Kowalski."
