The future of the CWC : implications for national implementation / Yasemin Balci V. Maintaining chemical peace : the CWC, the European Union, and political developments / Cindy Vestergaard

Résumé ou extrait : Since the entry into force of the Chemical Weapons Convention (CWC) in 1997, much progress has been made in destroying existing stockpiles of chemical weapons. However, the CWC is faced with new threats and challenges due to advances in science and technology and the changing international security, political and economic environment. On the eve of the Third Review Conference of the treaty, this report examines some of the most pressing challenges facing the CWC over the next decade.

Sujet - Titre uniforme : Convention sur l'interdiction et l'élimination des armes chimiques 1993

Sujet - Nom commun : Armes chimiques -- Contrôle -- Coopération internationale
Armes chimiques -- Contrôle -- Vérification
