Résumé ou extrait : The destruction of Japanese shipping by American forces was one of the most potent causes of Japan's devastating defeat in World War II. This unique book tells the complete story from the Japanese side for the first time. It explains vividly how the warrior-ethic of Japan's national character paradoxically hastened the rupture of its sea arteries until it could no longer fight. One is left pondering whether modern Japan's economic success stems from overcoming the strategic blunders that once resulted in two thousand ships beneath the waves of the Pacific.
