

Space warfare in the 21st century

Type de contenu : Texte

Type de médiation : sans médiation

Titre(s) : Space warfare in the 21st century : arming the heavens / Joan Johnson-Freese

Auteur(s) : Johnson-Freese, Joan

Editeur, producteur : London : New York (N.Y.) : Routledge, cop. 2017

Description matérielle : 1 vol. (XX-202 pages) ; 24 cm

Collection : Cass military studies

ISBN : 978-1-138-69386-9

1-138-69386-3

978-1-138-69388-3

1-138-69388-X

EAN : 9781138693883 br.

Appartient à la collection : Cass military studies

Classification décimale Dewey : 358.84

Note sur les bibliographies et les index : Notes bibliogr. Index

Note sur le contenu : Protecting space assets Congested, contested & competitive Avoiding Thucydides' trap Deter, defend, defeat Feeding the beast Space development & governance Space at the tipping point

Résumé ou extrait : Présentation de l'éditeur : "This book examines the recent shift in US space policy and the forces that continually draw the US back into a space-technology security dilemma. The dual-use nature of the vast majority of space technology, meaning of value to both civilian and military communities and being unable to differentiate offensive from defensive intent of military hardware, makes space an area particularly ripe for a security dilemma. In contrast to previous administrations, the Obama Administration has pursued a less militaristic space policy, instead employing a strategic restraint approach that stressed multilateral diplomacy to space challenges. The latter required international solutions and the United States, subsequently, even voiced support for an International Code of Conduct for Space. That policy held until the Chinese anti-satellite (ASAT) test in 2013, which demonstrated expanded Chinese capabilities. This volume explores the issues arising from evolving space capabilities across the world and the security challenges this poses. It subsequently discusses the complexity of the space environment and argues that all tools of national power must be used, with some degree of balance,

toward addressing space challenges and achieving space goals. This book will be of much interest to students of space policy, defence studies, foreign policy, security studies and IR."

Sujet - Nom commun : Guerre spatiale

Astronautique militaire

Astronautique -- Mesures de sécurité

Espace extra-atmosphérique -- Politique publique -- États-Unis

Espace extra-atmosphérique -- Rôle stratégique
