Rand Homeland Security Program - Éditeur scientifique

Editeur, producteur : Santa Monica (Ca) : RAND, 2009

Description matérielle : 1 vol. (IX-32 p.) : graph., tabl. ; 28 cm

Collection : Occasional paper OP-281-RC

ISBN : 978-0-8330-4914-8
0-8330-4914-3

Appartient à la collection : Occasional paper (Rand Corporation) 1934-1113 OP-281-RC

Classification décimale Dewey : 327.117

Note(s) : OP-281-RC
"RAND Homeland Security Program."

Note sur les bibliographies et les index : Bibliogr. p. 29-32

Note sur le contenu : Terrorist decisions : the targets of deterrence Security effects on terrorist attack planning Strategic, operational, and tactical deterrence-by-denial Analyzing the deterrent effects of security measures Discussion

Résumé ou extrait : Deterrence, a central feature of counterterrorism security systems and a major factor in the cost-effectiveness of many security programs, is not well understood or measured. This paper builds on a growing literature examining terrorist decisionmaking to examine the role of deterrence in counterterrorism strategy for homeland security. It discusses deterrence at the strategic, operational, and tactical levels and considers adaptations that would-be attackers are likely to make in response to security efforts. It also explores the connection between deterrence and risk transfer, which is the possibility that

successful deterrence may result in increased danger to other targets, including those of higher value to the defender. This paper offers a conceptual model for understanding how security systems may deter (or merely displace) attacks and a measurement framework for establishing the relative deterrent value of alternative security systems. Because deterrence may be the most important effect of some counterterrorism security programs, this framework may be useful to security policymakers who are trying to increase the security benefits they can achieve with limited resources
