Résumé ou extrait : Originally published in 1972, this book examines the scope and possibilities for small states in the conduct of their foreign policies. In the introduction the editor discusses the problem of defining the term 'small state' and outlines the restraints they face and the type of international roles they play. The subsequent chapters analyse the foreign policies of Norway, the Netherlands, Switzerland, Zambia, Israel, Cyprus, Cuba, Singapore and New Zealand. In each study the author examines the factors which shape that country's foreign policy objectives, the organizational structures employed to formulate

and implement foreign policy, the type and level of international involvement and the methods used to deal with the political, economic and security issues which make up and stem from the external policies. The book will be of interest to specialists and students of government, foreign policy analysis and other branches of international relations.
