Affective cybersecurity ; Estimative uncertainty ; Lying to the Nazis Automatic anxiety. Equal opportunity victimizer ; Ethical phish ; Symptom language Conti leaks. Perpetually responding to emergencies ; [Hacker's quickstart guide.txt] ; Parasitic on the target Coda : beyond threat informed security

Résumé ou extrait : "The perils of clicking an unknown link or divulging sensitive information via email are well-known, so why do we continue to fall prey to malicious messages? Examining practices and tools such as phishing, ransomware and clickbait, this groundbreaking book uses case studies of notorious cyberattacks and in-depth analysis of the messages themselves to unpack the rhetoric of cyberattacks and to help us to understand the small but crucial moments of indecision that pervade one of the most common forms of written communication."
