Résumé ou extrait : How the United States uses economic embargoes and financial tools as weapons against murderous terrorist groups and "rogue states" such as North Korea, Iran and Syria. Zarate, a senior adviser at the Center for Strategic and International Studies, is a former federal prosecutor who joined the U.S. Treasury Department after the 9/11 attacks to figure out ways to constrict the financing of terrorist groups. Relying heavily on anecdotes, acronyms and actual case studies, he provides detailed explanations of secretive operations far less publicized than ground wars and drone strikes.
