Burki Boko Haram and the challenges of Nigeria's war on terror / Samuel Oyewole

Résumé ou extrait : This book offers a timely and critical reflection on how states have responded to the test of terrorism in the long shadow of 9/11. Terrorism has become the hallmark of international relations

in the early twenty-first century. This book provides a policy-focused analysis of how certain states have responded to its test by employing a range of viewpoints that encompass state level responses down to a close interrogation of the nebulous non-state actors who have orchestrated spectacular political violence in contemporary times.
