Résumé ou extrait : La 4e de couv. indique : "The return of great power competition makes hard power critical to ensuring national security. Technological advances and economic constraints, however, are

making it more expensive and complex to field credible military formations. European medium powers are today faced with tough choices as to the capabilities they pursue, and how they structure their armed forces. Decision Points: Rationalising the Armed Forces of European Medium Powers examines these trade-offs and calls for policymakers to approach each key decision on the future of their country's military with a clearer sense of the consequences for the state's foreign policy."
