Résumé ou extrait : "For the first time in the modern era, Asia is not dominated by an outside power and contains within it three nations of global significance. Is this the Asian Century ? How will tensions between the US and China shape global politics? Covering Asian governance, culture, and society, this book introduces: the demography and geography of major nations; key economic developments including the Asian economic miracle; rapid expansion of military spending in the region; and the question of 'Asian values'. With further reading suggestions and discussion questions for every chapter, this is essential introductory reading for students of Asian Studies." (éd.)
