Résumé ou extrait : Frontkämpfer is a collection of World War II German photographs, the majority of which have never been published before. Sourced directly from personal photo albums of German veterans, Allied soldiers, and archival resources, readers are taken on a chronological journey through World War II, its beginning in September 1939 with the Blitzkrieg invasion of Poland and its culmination with the German surrender in Berlin in May 1945. Frontkämpfer takes the reader through the campaigns in Europe, North Africa, and the Soviet Union, as well as the air war and the war at sea. Featured in this volume are all branches of the German Wehrmacht: Heer, Luftwaffe, Kriegsmarine, Waffen SS, foreign volunteer legions, Volkssturm, and auxiliary support units. This book presents a detailed study of the uniforms, small arms, equipment, and machinery of the German military, including rare and experimental subject matter. Historically significant battles such as Stalingrad and wartime personalities are featured as well. As an added bonus, photographs from the early post-war years are included, highlighting the return of German POWs, the reconstruction of Germany, and the birth of the West German Bundeswehr and East German Nationale Volksarmee. Frontkämpfer is a must have for students of German military history.
