Note sur les bibliographies et les index : Bibliogr. p. [411]-418. Bibliogr. en fin de chapitres. Chronol. Index

Résumé ou extrait : "This second edition features more than 30 new entries, including coverage of recent high-profile events such as cyberattacks during the COVID-19 pandemic and the Russo-Ukrainian War. Other new entries examine the development and potential cybersecurity impacts of artificial intelligence, cryptocurrency, ransomware, and other emerging technologies. The documents section includes 7 new primary sources, offering perspectives from the U.S. government, European Union, People's Republic of China, and others. Updates to entries, the chronology, further readings, and the end-of-volume bibliography capture the significant developments of this ever-evolving topic. This new volume continues the expert scholarship of the first edition of Encyclopedia of Cyber Warfare, which was named a Top Ten Reference by Booklist in 2018." (éd.)
