Résumé ou extrait : La 4e de couv. indique : "Nuclear deterrence strategies remain rooted in Cold War models that do not take into account conflict between regional powers. Brokering Peace in Nuclear Environments offers an innovative theory of brokered bargaining to better understand and solve regional crises. Drawing on the history of conflict in nuclear South Asia, Moeed Yusuf describes the potential for third-party intervention to avert nuclear war. Moving beyond the widely accepted rational deterrence model, Yusuf offers an original perspective rooted in thoughtful analysis of the ways regional powers behave and maneuver in response to the pressures of strong global powers. With depth and insight, this book urges the international community to rethink its approach to nuclear deterrence."
