Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Energy cooperation in South Asia : utilising natural resources for peace and sustainable development / Mirza Sadaqat Huda

Auteur(s) : Huda, Mirza Sadaqat (19..-....)

Publication : London New York (N.Y.) : Routledge, 2020

Description matérielle : 1 vol. (XIV-194 p.) : ill. ; 24 cm

Collection : Routledge explorations in energy studies

ISBN : 978-0-367-42968-3

0-367-42968-3

978-1-03-223692-6

EAN : 9781032236926 br.

Appartient à la collection : Routledge explorations in energy studies Abingdon Routledge 2018

Classification décimale Dewey : 333.790 954

Note sur les bibliographies et les index : Bibliogr. en fin de chapitres. Index

Note sur le contenu : Historical context of challenges to energy cooperation in South Asia A constructivist approach to regional energy cooperation in South Asia The state of energy security and energy cooperation in South Asia Dissecting political challenges to energy cooperation in South Asia Accessing the failure of energy diplomacy in South Asia : a post-mortem of The MBI Pipeline De-securitizing the TAPI Pipeline : converging interests of countries, companies and communities through collaborative planning A cooperative security framework to bilateral hydroelectric projects in South Asia : a case study of the Tipaimukh Dam An environmental peacebuilding framework to multilateral hydroelectric projects in South Asia : a case study of BBIN hydroelectric cooperation Key findings and policy recommendations

Note de thèses et écrits académiques : Texte remanié de Doctoral thesis Political science University of Queensland (Australia) ?

Résumé ou extrait : "This book analyses the key political challenges to regional energy cooperation in South Asia. It argues that investment in the planning of regional energy projects can increase their viability and also drive integration and peacebuilding. Regional cooperation has been substantiated by academics and multilateral development banks as one of the most viable solutions to South Asia's crippling energy crisis. However, three decades of national and regional efforts have failed to develop a single multilateral energy project or foster high levels of bi-lateral cooperation. Using data collected through extensive interviews with policymakers in India, Bangladesh, Pakistan and Nepal, this book identifies the specific roadblocks to energy co-operation - including domestic politics and the failure of leadership on multiple levels - and evaluates how these political challenges determine regional interactions on energy securitization, environmental cooperation and human rights. Huda then undertakes case studies on four transnational energy projects to highlight specific policy recommendations to overcome these challenges, suggesting planning mechanisms through which the significant issue of energy cooperation in South Asia can be addressed. This book will be of great interest to students and scholars of energy security and geopolitics, natural resource governance and South Asian politics." (éd.)
