

Cyber weaponry

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Cyber weaponry : issues and implications of digital arms / Henry Prunckun, editor

Autre(s) responsabilité(s) : Prunckun, Henry W. (1954-....) (Éditeur scientifique)

Publication : Cham : Springer

Date de copyright : C 2018

Description matérielle : 1 vol. (XVI-198 pages) : ill. ; 24 cm

Collection : Advanced sciences and technologies for security applications

ISBN : 978-3-319-74106-2
3-319-74106-3

EAN : 9783319741062 rel.

Appartient à la collection : Advanced sciences and technologies for security applications (Print)
1613-5113

Classification décimale Dewey : 364.168 2

Note sur les bibliographies et les index : Bibliographie en fin de chapitres. Index

Résumé ou extrait : La 4e de couv. indique : "There is little doubt that cyber-space has become the battle space for confrontations. However, to conduct cyber operations, a new armory of weapons needs to be employed. No matter how many, or how sophisticated an aggressor's kinetic weapons are, they are useless in cyber-space. This book looks at the milieu of the cyber weapons industry, as well as the belligerents who use cyber weapons. It discusses what distinguishes these hardware devices and software programs from computer science in general. It does this by focusing on specific aspects of the topic: contextual issues of why cyber-space is the new battleground, defensive cyber weapons, offensive cyber weapons, dual use weapons, and the implications these weapons systems have for practice. Contrary to popular opinion, the use of cyber weapons is not limited to nation states (though this is where the bulk of news reporting focuses). The reality is that there isn't a sector of the political economy that is immune to cyber skirmishes. So, this book looks at cyber weapons not only by national security agencies and the military, but also by law enforcement, and the business sector: the latter includes administrations termed non-

government organisations (NGOs)."

Sujet - Nom commun : Cybercriminalité

Systèmes informatiques -- Mesures de sûreté

Réseaux d'ordinateurs -- Mesures de sûreté

Cyberterrorisme

Cyber-espionnage

Cyberstratégie

Cyberdéfense
