Résumé ou extrait : Présentation de l'éditeur : "The relationship between China and the United States has become the most important global issue in the twenty-first century. It is urgent to understand what is happening in China and where China is heading. However, there are many misconceptions about China in the West, which affect Westerners' ability to objectively understand China, and, ultimately influence the making of foreign policy toward China. The author attempts to challenge the misconceptions coming from both Western societies and China, and offer an integrated picture of contemporary China through systematically examining the major aspects of contemporary Chinese society and culture with the most

recent data, and presents convincing arguments in eighteen chapters for spurring mutual understanding between China and the West."
