

Handbook of electroencephalography and clinical neurophysiology

Type de contenu : Texte

Type de médiation : sans médiation

Type de support : Volume

Titre(s) : Handbook of electroencephalography and clinical neurophysiology / editor-in-chief, Antoine Rémond

Dans : Appraisal and perspective of the functional exploration of the nervous system 1, part A, B, C
Electrical activity from the neuron to the EEG and EMG 2, part D
Techniques and methods of data acquisition of EEG and EMG 3, part C
Evaluation of bioelectrical data from brain, nerve and muscle 4-I, part C
Evaluation of bioelectrical data from brain, nerve and muscle 5-II, part A
Evaluation of bioelectrical data from brain, nerve and muscle 5-II, part. B
The normal EEG throughout life 6, part B
Physiological correlates of EEG 7
Electrical reactions of the brain and complementary methods of evaluation 8, part A
Electrical reactions of the brain and complementary methods of evaluation 8, part B
Somatic sensation 9
Direct, cortical and depth evaluation of the brain 10, part A
Direct, cortical and depth evaluation of the brain 10, part C
Clinical EEG 13-III, part A
Clinical EEG 3-5
Electromyography 16, part A
Electromyography 16, part B

Auteur(s) : International congress of electroencephalography and clinical neurophysiology 07 1969 San Diego

Autre(s) auteur(s) : Rémond, Antoine (1917-1998) médecin
Fédération internationale des sociétés d'électroencéphalographie et de neurophysiologie clinique

Publication : Amsterdam : Elsevier Publishing Company

Fabrication / Impression : C1971-C1978

Description matérielle : 16 vol. : ill. ; 27 cm

ISBN : 0-444-80125-1

Note(s) : La publication comprend 39 fascicules publiés en 16 volumes. Certains volumes comprennent

plusieurs parties.
