policies / Robert Dalsjö Strategic management for military capabilities : seeking ways to innovate military capabilities - Indian initiatives / Arun Kumar Singh Building dynamic defense / Sugio Takahashi Policy implications strategic management of military capabilities / NIDS Strategic Management Research Team

Résumé ou extrait : La préface indique : "In preparing for the future, which is the core exercise of "strategic management," it is essential for a country to anticipate and assess various risks that could arise, and to realize "disruptive" innovations ahead of others that would reverse the position of advantage between their country and others. The possible ways to accomplish these goals would include: investing limited resources selectively and intensively into areas expected to grow in the future; procuring from abroad resources that are too scarce domestically for achieving declared goals; and deliberately establishing a system that would make an organization and its functions change daily in order to speedily cope with changes in environment and competitive conditions. This expertise is already established in the study of management; how to apply it to processes of operating military organizations and of setting military strategies are the themes of strategic management"
