EAN : 9780385539005 rel.

Classification décimale Dewey : 364.168 2

Note sur les bibliographies et les index : Notes bibliogr. Index

Résumé ou extrait : Présentation de l'éditeur : "Technological advances have benefited our world in immeasurable ways, but there is an ominous flip side. Criminals are often the earliest, and most innovative, adopters of technology, and modern times have led to modern crimes. Today's criminals are stealing identities, draining online bank accounts, and erasing computer servers. It's disturbingly easy to activate baby monitors to spy on families, to hack pacemakers to deliver a lethal jolt of electricity, and to analyze a person's social media activity to determine the best time for a home invasion. Meanwhile, 3D printers produce AK-47s, terrorists can download the recipe for the Ebola virus, and drug cartels are building drones. In Future Crimes, Marc Goodman raises tough questions about the expanding role of technology in our lives."

Sujet - Nom commun : Cybercriminalité
