Résumé ou extrait : "This is an assessment of how the rise of Chinese seapower will affect U.S. maritimes strategy in Asia."

"Combining a close knowledge of Asia and an ability to tap Chinese-language sources with naval combat

experience and expertise in sea-power theory, the authors assess how the rise of Chinese sea power will affect U.S. maritime strategy in Asia. The book considers how strategic thought about the sea shapes Beijing's deliberations and compares China's geostrategic predicament to that of the Kaiser's Germany a century ago. It examines the Chinese navy's operational concepts, tactics, and capabilities and appraises China's ballistic-missile submarine fleet." (éditeur)
