Measuring Energy Security : A Case Study of Indonesia 4. Energy and Environmental Scenario of South Asia 5. Energy and Environmental Scenario of India 6. Energy and Environmental Security Nexus of Pakistan

Résumé ou extrait : "This book presents a comprehensive account of the energy and environmental security perspectives of the developing countries. To address the subject comprehensively, it covers four geographically diverse clusters of developing countries from across the world. The regions particularly focused on are: South Asia, South East Asia, Sub Sahara Africa, and Latin America. It is a valuable contribution to the debate, and policy and research activities around the subjects of energy and environmental security in the developing countries and beyond. The book covers the interwoven subjects

of energy security and environmental security in the context of developing countries for the first time. It discusses the latest dimensions, challenges, and solutions around taking into account technical, economic, social, and policy perspectives. It incorporates up-to-date data, case studies, and comparative assessment. This edited book has contributions from established as well as emerging scholars from around the world. It benefits a wide range of stakeholders from the fields of energy, environment, and sustainable development. It is of help to academics, researchers, and analysts in these fields besides having appeal for policymakers, and national and international developmental organizations. It also helps developing countries to learn from each others experiences." (4e de couv.)

Sujet - Nom commun : Sécurité énergétique -- Pays en voie de développement

Politique de l'environnement -- Pays en voie de développement

Sécurité nationale -- Pays en voie de développement
