Résumé ou extrait : "This volume brings to the forefront a variety of critical conflicts in the world and a wide spectrum of peace communication approaches. The volume provides an in-depth look at how intricate and intractable conflicts can be and how the communicative aspects of conflicts can be equally challenging. The volume includes an incisive review and guide to past and present knowledge in the field of conflict and peace communication. It features an outstanding team of scholars, practitioners and activists and is truly interdisciplinary in spirit. It is divided into five easy to navigate sections titled Theory Development, Method Development, Traditional/Digital Media and Peace and Conflict, Case Studies, and Innovative Approaches. A key theme throughout the Handbook is the utilization of past conflict communication theory to posit workable and innovative peace communication strategies that inform today's conflicts and can be a vital register of such communicative practices for the future. The

volume also focuses on strategies of peace communication from the margins that acknowledge and elevate solutions for and from those who are most vulnerable. This volume will be indispensable to the teaching, study and practice of conflict negotiation, peacebuilding, intercultural communication, positively affecting race relations and much more. This timely publication provides students, academics and practitioners tools to navigate more and more complex local and global conflict and peace communication issues in our world." (éditeur)
