

Global Atlas of Marine Fisheries

Type de contenu : Texte

Titre(s) : Global Atlas of Marine Fisheries [texte imprimé] : A critical appraisal of catches and ecosystem impacts / Pauly Daniel ; Zeller Dirk

Mention d'édition : Island Press

Editeur, producteur : London : Island Press, 2016

Description matérielle : 497 p. ; 28 cm.

ISBN : 978-1-61091-769-8

Résumé ou extrait : The Global Atlas of Marine Fisheries is the first and only book to provide accurate, country-by-country fishery data. This groundbreaking information has been gathered from independent sources by the world's foremost fisheries experts, and edited by Daniel Pauly and Dirk Zeller of the Sea Around Us Project. The Atlas includes one-page reports on 273 countries and their territories, plus fourteen topical global chapters. National reports describe the state of the country's fishery, by sector; the policies, politics, and social factors affecting it; and potential solutions. The global chapters address cross-cutting issues, from the economics of fisheries to the impacts of mariculture. Extensive maps and graphics offer attractive and accessible visual representations. While it has long been clear that the world's oceans are in trouble, the lack of reliable data on fishery catches has obscured the scale, and nuances, of the crisis. The atlas shows that, globally, catches have declined rapidly since the 1980s, signaling an even more critical situation than previously understood. The Global Atlas of Marine Fisheries provides a comprehensive picture of our current predicament and steps that can be taken to ease it. For researchers, students, fishery managers, professionals in the fishing industry, and all others concerned with the status of the world's fisheries, the Atlas will be an indispensable resource.
