Résumé ou extrait : To address the complex issues related to nuclear proliferation in Asia, The National Bureau of Asian Research, with support from the National Nuclear Security Administration at the Department of Energy, organized a one-day workshop in Washington, D.C. in December 2006 to explore the implications of the spread of nuclear weapons in North Korea and Iran for regional security, the global nonproliferation regime, and U.S. nonproliferation policy. The papers featured in this volume of the NBR Analysis, written by former officials from the Clinton and George W. Bush administrations, Gary Samore and Mitchell Reiss, emerged from the workshop. With their distinguished government service and their continued involvement on nonproliferation issues, Samore and Reiss challenge conventional thinking on recent developments in the nuclear arena and offer innovative insights and

strategies for addressing them.

Sujet - Nom commun : Non-prolifération nucléaire

Armes nucléaires -- Iran

Armes nucléaires -- Corée (République populaire démocratique)
