Allowance from the CIA

Résumé ou extrait : La 4e de couv. indique : "This book investigates the geopolitics and strategic dimensions of US-American foreign policy under the presidents George W. Bush and Barack Obama. Based on a vast amount of empirical and historical sources, the author offers deep insights into the recent political developments such as the Arabellions along the axis of Northern Africa, the Middle East, and Central Asia, situating them in the context of the global geopolitical and geo-economical Great Game, either latent or overt, between USA/NATO and Russia. The author also analyses how US politics has influenced these historical and political processes in the last two decades."
