Note sur les bibliographies et les index : Bibliographie pages [453]-496. Index

Résumé ou extrait : Fully revised to incorporate recent developments, this third edition of International Security Studies provides students with a comprehensive and accessible textbook on security with a particular emphasis on the use of case studies to illustrate theoretical debates. In addition to presenting the major theoretical perspectives, the book examines a range of important and controversial topics in covering both traditional military and non-military security issues such as nuclear proliferation, humanitarian intervention, food security and environmental security. Unlike most standard textbooks, the volume also offers a wide range of case studies - including chapters on the US, China, the Middle East, Russia, East Africa and the Arctic - providing detailed analyses of important global security issues and the application of theoretical debates to major contemporary issues. This textbook will be essential reading for all students of Security Studies and highly recommended for students of critical security studies, human security, peace and conflict studies, foreign policy and International Relations in general.

Key concepts of International Relations and Globalization are defined and explained. Hence this textbook introduces students to the full range of security issues in a clear, concise accessible format.
