Résumé ou extrait : "This book argues that the new great power contest between the United States and the People's Republic of China, which has as its epicentre the complex Indo-Pacific region, is having a detrimental impact on the region's existing order system. Analysing why the great powers are increasingly at loggerheads, the manifold risks this entails, and how the various stakeholders in the Indo-Pacific can find a durable regional order more constructive than confrontational, the book, avoiding theory, proposes a new equilibrium based on practical ways to manage burgeoning conflict and maintain order and stability by compartmentalising problems and challenges while seeking to maintain a balance among stakeholder interests."
