Résumé ou extrait : "This book explores non-state actors that are or have been migratory, crossing borders as a matter of practice and identity. Where non-state actors have received considerable attention amongst political scientists in recent years, those that predate the state--nomads--have not. States, however, tend to take nomads quite seriously both as a material and ideational threat. Through this volume, the authors rectify this by introducing nomads as a distinct topic of study. It examines why states treat nomads as a threat and it looks particularly at how nomads push back against state intrusions. Ultimately, this exciting volume introduces a new topic of study to IR theory and politics, presenting a detailed study of nomads as non-state actors."
