Résumé ou extrait : La 4e de couv. indique : "This book seeks to go beyond conventional literature on the North Korean nuclear issue by examining the chances of survival of the Kim Jong Un regime, both with and without the nuclear weapons program. It offers a detailed historical background of the dysfunctional North Korean economy, explores the contemporary socioeconomic condition of the country, examines the failures of the Six-party Talks and other attempts at negotiations with North Korea, and outlines a blueprint for the survival of the regime through rapid economic modernization to be put forward by the five stakeholder nations in exchange for dismantlement of the nuclear weapons program."
