ISBN : 978-1-250-24929-6
1-250-24929-5

EAN : 9781250249296 rel.

Classification décimale Dewey : 303.330 951

Note sur les bibliographies et les index : Bibliogr. p. [284]-302. Index

Résumé ou extrait : "Josh Chin and Liza Lin's Surveillance State is a groundbreaking work of investigative nonfiction on life in China's burgeoning surveillance state. People living in democracies have for decades drawn comfort from the notion that their form of government, for all its flaws, is the best history has managed to produce. Surveillance State documents with startling detail how even as China's Communist Party pays lip service to democracy as a core value of "socialism with Chinese characteristics," it is striving for something new: a political model that shapes the will of the people not through the ballot box but through the sophisticated--and often brutal--harnessing of data. On the country's remote Central Asian frontier, where a separatist movement strains against Party control, China's leaders have built a dystopian police state that keeps millions under the constant gaze of security forces armed with AI. Across the country in the city of Hangzhou, the government is weaving a digital utopia, where tech giants help optimize the friction out of daily life. Award-winning journalists Josh Chin and Liza Lin take readers on a journey through both places, and several in between, as they document the Party's ambitious push--aided, in some cases, by American technology--to engineer a new society around the power of digital surveillance. China is hardly alone. As faith in democratic principles wavers, advances in surveillance have upended debate about the balance between security and liberty in countries around the globe, including the US. Succeed or fail, the Chinese experiment has implications for people

everywhere." (éditeur)
