Résumé ou extrait : Présentation de l'éditeur : "Beginning with the D-day landings, this is a frank appraisal of the planned use and actual results of the deployment of armour by both German and Allied commanders in the major tank battles of the campaign including Epsom, Goodwood, Cobra and Totalize. 'Tiger!' is a critique of how Montgomery's plans to seize territory and break out failed in the face of German resistance. It details the poor planning by British generals who made many mistakes and how the German convoluted chain of command contributed to their own defeat."
