

A supplement to all former treatises on the uses of the globes, render'd necessary from the late improvements exhibited to the public by Mr.

Type de contenu : Texte

Titre(s): A supplement to all former treatises on the uses of the globes, render'd necessary from the late improvements exhibited to the public by Mr. / Edward MOORE . Neale's patent globes, In two parts. Part I. introductory : Containing the description and uses of the several circles and points on the globes, intended for the instruction and benefit of young beginners. Part II. Supplemental. Wherein the superior excellency and utility of the globes are exemplified, in the solution of above one hundred curious problems in those noble sciences, astronomy, geography, and navigation ; in so plain and intelligible a manner, that such, who were before strangers to the nature and cause of the phoenomena resulting from them otions of the heavenly bodies, may with the great Eate obtain a competent knowledge thereof
