Résumé ou extrait : Présentation de l'éditeur : "Contemporary security has expanded its meaning, content and structure in response to globalization and the emergence of greatly improved world-wide communication. This book addresses how and why the nature of security has changed and what this means for the security actors involved and the wider society. The expert contributors reflect upon new communication methods, post-modern concepts of warfare, technological determinants and cultural preferences to provide new theoretical and analytical insights into a changing security environment and the protocols of war in the 21st century."
