Résumé ou extrait : Moving from a historical and cultural perspective, this book examines the geopolitical and socio-economic changes involving the enlarged Mediterranean. Organised into two main sections, the first section (The new centrality of the Mediterranean Basin: Trends and Dynamics) is devoted to the analysis of the most relevant drivers and interdisciplinary broader issues, and the second

section (Hotspots of Crisis and Regional Interferences in the Mediterranean) assesses the situation in some areas interested by the waves of uprisings since 2011-12. The book aims to uncover this new, critical centrality of the Mediterranean in the global scenario through the analysis of the interactions and intertwining of those trends and dynamics offering a historical holistic broad view. What follows is an Italian perspective that is the result of the research of a group of scholars who have been working for years on the first-hand sources of the countries examined. A peculiar vision connected not only to its unique geographical position at the center of the basin, but also to its deep relations with the southern shore throughout its long history.
