Résumé ou extrait : "No nation was more deeply affected by America's rise to world power than Japan. President Franklin Roosevelt's unprecedented policy of unconditional surrender led to the catastrophic finale of the Asia-Pacific War and the most intrusive international reconstruction of another nation in modern history. Japan in the American Century examines how Japan, with its deeply conservative heritage, responded to the imposition of a new liberal order. The price Japan paid to end the occupation was a cold war alliance with the United States that ensured America's dominance in the region. Still traumatized by its wartime experience, Japan developed a grand strategy of dependence on U.S. security guarantees so that the nation could concentrate on economic growth. Yet from the start, despite American expectations, Japan reworked the American reforms to fit its own circumstances and cultural preferences, fashioning distinctively Japanese variations on capitalism, democracy, and social institutions" (ed.)
