Résumé ou extrait : In Cybersecurity and Cyberwar: What Everyone Needs to Know, New York Times best-selling author P. W. Singer and noted cyberexpert Allan Friedman team up to provide the kind of deeply informative resource book that has been missing on a crucial issue of 21st-century life. Written in a lively, accessible style, filled with engaging stories and illustrative anecdotes, the book is structured around the key question areas of cyberspace and its security: how it all works, why it all matters, and what we can do. Along the way, they take listeners on a tour of the important (and entertaining) issues and characters of cybersecurity, from the Anonymous hacker group and the Stuxnet computer virus to the new cyberunits of the Chinese and US militaries. Cybersecurity and Cyberwar: What Everyone Needs to Know is the definitive account of the subject for us all, which comes not a moment too soon.

Sujet - Nom commun : Cyberspace -- Mesures de sécurité -- États-Unis

Cyberterrorisme -- Lutte contre -- États-Unis

Criminalité informatique -- États-Unis
