Classification décimale Dewey : 341.409 6

Note sur les bibliographies et les index : Bibliogr. en fin de chapitres

Résumé ou extrait : La 4e de couv. indique : "This book provides an overview of the space sector in African countries, from a legal and policy point of view, analysing how the African Union's space policy and strategy (ASPS) is implemented and highlighting the various space activities in each country. Against this backdrop, it investigates the ASPS, identifying its policy goals identified and discussing its strategy. Moreover, it explores the on-going regional cooperation programmes, the continent's leading space actors and their roles, and the space-related regional fora and organizations, reflecting on various initiatives, including the African Leadership Conference on Space Science and Technology for Sustainable Development (ALC), the Regional African Satellite Communications Organisation (RASCOM), and the African Resource Management Satellite Constellation (ARMS-C). As such, it is a valuable source of information on space capacities in African countries."
