Résumé ou extrait : "This volume features more than 25 papers that were presented at the 2014 Conference of the International Association for the Study of Controversies, IASC, held at the University of Salento, Lecce, Italy. It looks at conflict and conflict resolution from diverse perspectives. Coverage explores the paradox of conflict and examines how discord can be both a source of chaos as well as a foundation for unity, a limitation of potential as well as an entryway to a greater depth of living. Inside, readers will discover answers to such questions as: What are the conditions to ensure that a conflict can

be converted into cooperation? If the conflict between interests can be solved by a compromise, what happens when a conflict involves non-negotiable values? By the end of the book, readers will have a better understanding of how conflict can be transcended and how it's possible to redefine the conflicting situation so that what seemed incompatible and locked may, in fact, open a new perspective"
