

Rockets and revolution

Type de contenu : Texte

Type de médiation : sans médiation

Titre(s) : Rockets and revolution : a cultural history of early spaceflight / Michael G. Smith

Auteur(s) : Smith, Michael G. (1960-....)

Adresse bibliographique : Loncoln [etc.] : University of Nebraska Press, cop. 2014

Description matérielle : 1 vol. (431 p.) : ill., jaquette ill. ; 24 cm

ISBN : 9780803255227

EAN : 9780803255227

Classification décimale Dewey : 629.4/10904 23

Note sur les bibliographies et les index : Bibliogr. p. 417-419. Notes bibliogr. Index.

Résumé ou extrait : “Rockets and Revolution offers a multifaceted study of the race toward space in the first half of the twentieth century, examining how the Russian, European, and American pioneers competed against one another in the early years to acquire the fundamentals of rocket science, engineer simple rockets, and ultimately prepare the path for human spaceflight. Between 1903 and 1953, Russia matured in radical and dramatic ways as the tensions and expectations of the Russian revolution drew it both westward and spaceward. European and American industrial capacities became the models to imitate and to surpass. The burden was always on Soviet Russia to catch up--enough to achieve a number of remarkable “firsts“ in these years, from the first national rocket society to the first comprehensive surveys of spaceflight. Russia rose to the challenges of its Western rivals time and again, transcending the arenas of science and technology and adapting rocket science to popular culture, science fiction, political ideology, and military programs. While that race seemed well on its way to achieving the goal of space travel and exploring life on other planets, during the second half of the twentieth century these scientific advances turned back on humankind with the development of the intercontinental ballistic missile and the coming of the Cold War“
