Résumé ou extrait : La p. de garde indique : "This volume brings together established and emerging scholars from academia and think tanks to reflect on important, conceptual, strategic and developmental issues in India's national security. It provides a comprehensive understanding of national security through a more open approach, covering both traditional and non-traditional concerns that have a bearing on the

survival and well-being of humanity. It discusses key themes such as perceptions about China, civil-military relations, gender and military, nuclear safety, arms trade and cybersecurity, human security, food and water security, soft power and the media's role in covering security issues. As a festschrift for Commodore C. Uday Bhaskar, it highlights and adds to his scholarly contributions to the national security debate in the country for the past three decades. A unique contribution, this volume will be indispensable for students and researchers of politics and international relations, national security, human security, geopolitics, non-traditional security, military and strategic studies, and South Asian studies."
