Résumé ou extrait : Présentation de l'éditeur : "This book, first published in 1930 and reissued in 1968, treats a group of problems arising when competition is either precluded or limited. It examines absolute and limited monopoly; cases in which a few enterprises compete; cases in which two or three enterprises or organisations face one another as buyer and seller. The underlying general problem is the price in markets where there is only a limited number of enterprises."
